Malaysia's AI-Powered Scam Response Platform

THE PROBLEM

The “Golden Hour” Crisis

- The Problem: In Malaysia, the first **60 minutes** after a scam, the "Golden Hour", determine if funds can be recovered.
- The Friction: Current reporting is manual, emotional, and fragmented, leading to critical delays.
- The Mission: ScamBreaker collapses the time between "Victim Realization" and "Authority Action" using AI-driven triage.

Scams Move Fast - Malaysia's Response Doesn't

- Malaysia lost **RM2.6 billion** to scams in **2024**
- Average victim takes **3–5 days** to file a proper report
- Bank freeze window is only 60 minutes - most victims miss it
- Existing reporting (Semakin, CCID portal) is slow, form-heavy, and in English only

59:59

THE COST OF DELAY

Recovery Drops with Every Minute of Delay

**Illustrative recovery curve based on industry patterns*

Why Victims Miss the 60-Minute Window

- Panic and confusion - victims don't know the next step
- Multiple platforms (bank, police, portal) with no clear starting point
- Repetitive, form-heavy reporting slows action
- Language barriers limit accessibility (English-only systems)
- No real-time guidance during the critical first hour

***“By the time help starts,
the money is already gone.”***

OUR SOLUTION

03

Scambreaker utilises a Dual-Portal Architecture.

Victim Portal

- Conversational AI intake that transforms trauma into structured data.
- AI chat intake in 4 languages → instant case creation

Authority Portal

- A command center for investigators to triage and route cases based on live-decaying urgency.
- Live triage dashboard with SLA timers and auto-generated documents

USER FLOW

01

Victim describes
scam in plain
language

02

AI classifies, scores,
and routes the case
automatically

03

Authority gets a
prioritised case with
documents ready to
send

KEY FEATURES

01

Z.AI GLM Chat Intake

Conversational AI, not a form. Supports EN/BM/ZH/TA

02

Recoverability Score

0–100 real-time score that decays as time passes

03

SLA Command Centre

Colour-coded urgency dashboard for authorities

04

Auto-generated Documents

Police report + bank dispute letter, ready to send

INNOVATIONS

06

Innovation 1 *Z.AI Intake & Client-Side OCR*

- **Conversational Intelligence:** ZAI (GLM-5.1) conducts a guided intake in EN, BM, ZH, or TA, ensuring no key facts are missed.
- **Privacy-First OCR:** Utilizes Tesseract.js and pdf.js for client-side text extraction from screenshots and bank statements.
- **Data Synthesis:** OCR text is fed into the LLM context hidden from the user, allowing the AI to "read" evidence in real-time.

The screenshot displays a user interface for reporting a scam. At the top, a chat window shows a greeting from the 'ScamBreaker incident intake assistant' and a request for details. Below the chat, there are language selection buttons for English, Bahasa Melayu, 中文 (Mandarin), and தமிழ். A blue message bubble contains the user's report: 'I transferred RM5000 to a Maybank account yesterday after someone on WhatsApp pretended to be from LHDN saying I owed taxes.' Below this, an orange banner indicates an 'URGENT' case with a '24 hours' deadline, involving 'RM 5,000 • Government impersonation' assigned to 'PDRM CCID'. The 'YOUR ACTION PLAN' section lists three steps: 1. 'Call Your Bank's Fraud Hotline' (IMMEDIATE), 2. 'Call NSRC — National Scam Response Centre' (IMMEDIATE), and 3. 'Preserve All Evidence' (URGENT). Each step includes a brief instruction and a 'Call Now' button. A fourth step, 'File Police Report Within 24 Hours' (STANDARD), is partially visible at the bottom.

INNOVATIONS

Innovation 2

The Recoverability Engine

- Scambreaker uses a 6-factor scoring algorithm for auditability

$$R = R_0 + \sum_i w_i F_i - D(t)$$

R_0 : Base recoverability

F_i : Key factors (time, transfer type, evidence, etc.)

w_i : Impact weight of each factor

$D(t)$: Time-based decay function

- Scoring Tiers:
 - Critical (≥ 80): Transaction <30m ago, immediate bank freeze possible.
 - High (≥ 60): Urgent same-day intervention.
 - Low (< 40): Recovery unlikely, automated archiving.

Recoverability Score	
85/100	CRITICAL
80/100	CRITICAL
70/100	HIGH
62/100	HIGH
48/100	MEDIUM

AUTHORITY COMMAND CENTER

Case ID	Type	Recoverability Score	SLA	Status	Outcome
cmoe63ok...	Investment Scam	85/100 CRITICAL	🕒 120m left	ACTION REQUIRED	— View Details
cmoe63ok...	Government Impersonation	80/100 CRITICAL	🕒 60m left	IN PROGRESS	— View Details
cmoe63ok...	Parcel Delivery Scam	70/100 HIGH	🕒 30m left	IN PROGRESS	— View Details
cmoe63ok...	E-commerce Impersonation	62/100 HIGH	🕒 60m left	NEEDS INFO	— View Details
cmoe63ok...	Job Scam	48/100 MEDIUM	🕒 60m left	ROUTED	— View Details

Live-decaying SLA

The dashboard sorts cases by their current recoverability, not just submission time.

Duplicate Detection

Identifies recurring scam patterns (amount/type) to flag coordinated "Scam Waves".

State Machine Integrity

A strict Finite State Machine (FSM) ensures every case follows a legal audit trail.

AUTOMATION AND DOCUMENT PIPELINE

Victim Statement

GLM-powered restructuring of emotional narratives into formal legal drafts.

Hello, John. I am the ScamBreaker incident intake assistant.

Please tell me what happened. Include any details like names, numbers, or websites. This helps me send your report to the right team.

English

Bahasa Melayu

中文 (Mandarin)

தமிழ்

I transferred RM5000 to a Maybank account yesterday after someone on WhatsApp pretended to be from LHDN saying I owed taxes.

CRITICAL — Act within 60 minutes
RM 6,500 • Bank/Government Impersonation
Assigned to PDRC CCID

YOUR ACTION PLAN
Complete these steps after submitting your report.

- 1 Call Your Bank's Fraud Hotline** IMMEDIATE
Based on your bank, call their fraud hotline immediately to freeze your account.
[Call Now](#)
- 2 Call NSRC — National Scam Response Centre** IMMEDIATE
Report to the national hotline. They can coordinate with multiple banks simultaneously.
[Call 897](#)

3 Preserve All Evidence URGENT
Screenshot every message, transaction receipt, and the scammer's profile before they disappear.

4 File Police Report Within 24 Hours STANDARD
Bring your IC, bank statements, and screenshots to the nearest police station.

Police Report

POLICE REPORT

Statement for reporting a scam incident

Date: 25 April 2026

Purpose: Report of suspected scam / fraud incident

To the Officer in Charge,

I wish to lodge a police report regarding a scam incident that caused financial loss and requires investigation.

STATEMENT OF FACTS

Police Report Draft

Case: cmoe6o75p0001ggko2weitkn

Type: Bank/Government Impersonation

Statement:

Victim Details

- Name: John Doe
- Email: victim@example.com
- Phone Number: 012-3456789
- IC Number: 900101-14-1234

Statement Summary

- Scam Type: Impersonation scam
- Amount Involved: RM6,500
- Payment Method: Bank transfer
- Date/Time of Incident: -
- Reporting Date: -
- Source Bank: -
- Destination Bank: CIMB
- Channel Used: Phone call (03-88801234)
- Suspected Scam Pattern: Government agency impersonation with arrest threat and immediate payment demand
- Attachments Provided: No

Victim Statement

The victim received a phone call from the number 03-88801234, during which the caller claimed to represent LHDN (Inland Revenue Board of Malaysia). The caller alleged that the victim had an outstanding tax liability of RM12,000 and threatened immediate arrest if the amount was not settled. Under duress, the victim transferred RM6,500 to a

CIMB account number provided by the caller. The victim states that the urgency of the arrest threat caused panic, which led to the transfer being made.

SUPPORTING EVIDENCE

Relevant supporting evidence may include transaction receipts, screenshots of messages, call records, account details, and any other related documents.

I respectfully request that this matter be recorded and investigated accordingly.

Thank you.

Complainant

Bank Dispute Letter

BANK DISPUTE LETTER

Fraud Transaction Dispute Request

Date: 25 April 2026

Subject: Request for urgent review of suspected scam transaction

To whom it may concern,

I am writing to formally notify the bank of a suspected fraudulent transaction and to request urgent review, protective action, and any available recovery measures.

INCIDENT DETAILS

Subject: Dispute Request for Suspected Scam Transaction

Case Reference: cmoe6o75p0001ggko2weitkn

Claimed amount: RM 6500

Incident summary: - Scammer impersonated LHDN (Inland Revenue Board) claiming RM 12,000 unpaid tax

- Victim panicked and transferred RM 6,500 to CIMB account
- Call originated from 03-88801234
- Transfer occurred just moments ago (< 60 minutes)

REQUEST TO THE BANK

I respectfully request that the bank review this transaction immediately, flag any suspicious activity associated with the transfer, and advise on the next steps required for dispute handling and account protection.

I am prepared to provide any supporting documents, screenshots, receipts, or statements required for investigation.

Thank you.

Yours faithfully,

Account Holder / Complainant

Authority manual intervention time is reduced by 80%, focusing effort on fund recovery.

TECH STACK

Layer	Technology
Framework	Next.js 16 (App Router)
Database	PostgreSQL via Prisma v6
AI Strategy	Z.AI GLM-5.1 (with multi-model fallback)
Authentication	JWT (jose) with HTTP-only cookies
OCR	Tesseract.js (client-side)

IMPACT AND DIFFERENTIATION

Impact

- ScamBreaker reduces victim report time from 15–30 min → under 2 min
- Targets the 60-minute golden window where bank freezes are still possible
- Supports 4 languages (EN/BM/ZH/TA) - reaching victims who can't report in English
- Auto-generates police reports and bank dispute letters, cutting officer workload by hours per case

Differentiation

- AI chat intake instead of static forms - extracts facts from emotional, unstructured messages
- Live recoverability score (0–100) tells authorities exactly how urgent each case is - no existing tool does this
- Real-time SLA dashboard with colour-coded breach alerts - authorities know when to act before it's too late
- Duplicate case detection flags coordinated scam campaigns automatically
- Client-side OCR processes uploaded screenshots and PDFs without sending raw files to a server - privacy-first by design
- Not a prototype concept - fully functional end-to-end, from victim intake to authority dispatch

SECURITY, TRUST AND THE FUTURE OF OUR PROJECT

Privacy-First Foundation

- Zero-Knowledge Evidence: OCR processing for screenshots and PDFs occurs entirely on the victim's device using Tesseract.js.
- Data Integrity: No raw sensitive images are stored on our servers, minimizing data liability.
- Immutable Audit Trails: Every status change and internal action is logged in the WorkflowLog for full legal transparency and accountability.

We are building more than a portal;
we are building the standardized, AI-accelerated
response infrastructure for the
National Scam Response Centre (NSRC).

Strategic Future Roadmap

- Phase 2: Direct Intervention
 - Real-time bank API integration for instant, automated fund-freeze requests.
 - Direct PDRM / MCMC API hooks for seamless, one-click official report filing.
- Phase 3: National Expansion
 - **Mobile Ecosystem:** Native iOS/Android app for frictionless victim reporting.
 - **Cross-Agency Sync:** Unified case-sharing dashboard for NSRC, PDRM, and BNM to eliminate data silos.

THANK YOU!

Windows 12
